MKD Slidea — User Manual

Interactive live presentations, polls, quizzes & word clouds — for teachers, trainers and event hosts. Platform: slidea.mismath.net · Version: July 2026

Welcome to **MKD Slidea**, the platform that turns any classroom, training or event into a two-way conversation. This manual walks you through everything — from your first login to running a live session with hundreds of participants responding from their phones.

How to read this manual: Sections 2–6 are for **hosts** (the person running the session). Section 7 is for **participants** (the audience). Section 8 covers **templates & pricing**, and Section 9 gives **teaching tips** to get the most out of every session.

1. What is MKD Slidea?

MKD Slidea is a real-time audience-engagement platform. As a host, you project a presentation on a screen; your audience joins from any phone or laptop using a short code, and answers polls, quizzes, word clouds, ratings and open questions **live**. Their responses appear instantly on your screen as animated charts, leaderboards and word clouds.

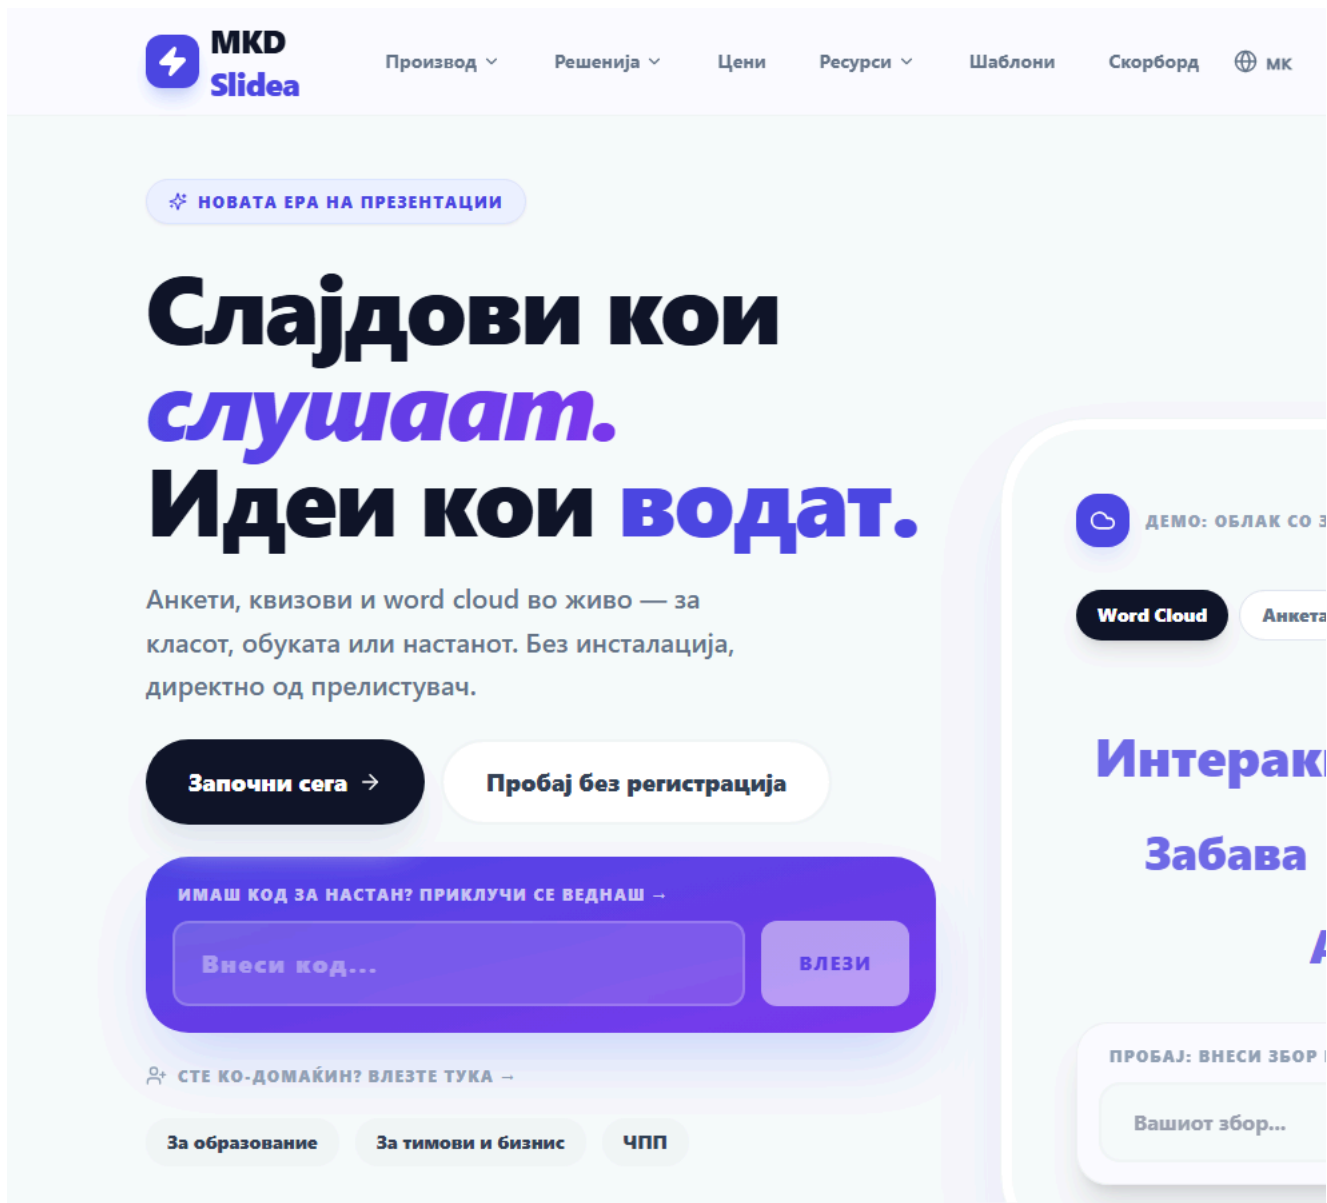

What you can do with it: - Run **8 types of activities**: multiple-choice poll, quiz (with leaderboard), word cloud, open text, star rating, ranking, 1–10 scale, and multi-question surveys. - See **live results** projected to the room, with a real-time participant counter. - Use your **phone as a remote control** while the presentation runs on the projector. - Generate questions with **AI**, aligned to your curriculum. - Reuse and share **ready-made templates**. - Brand your sessions with your own colors and logo.

No app to install — participants just open a link or scan a QR code.

2. Getting Started

2.1 The landing page

The home page explains the platform and lets participants jump straight into a session by entering a code.

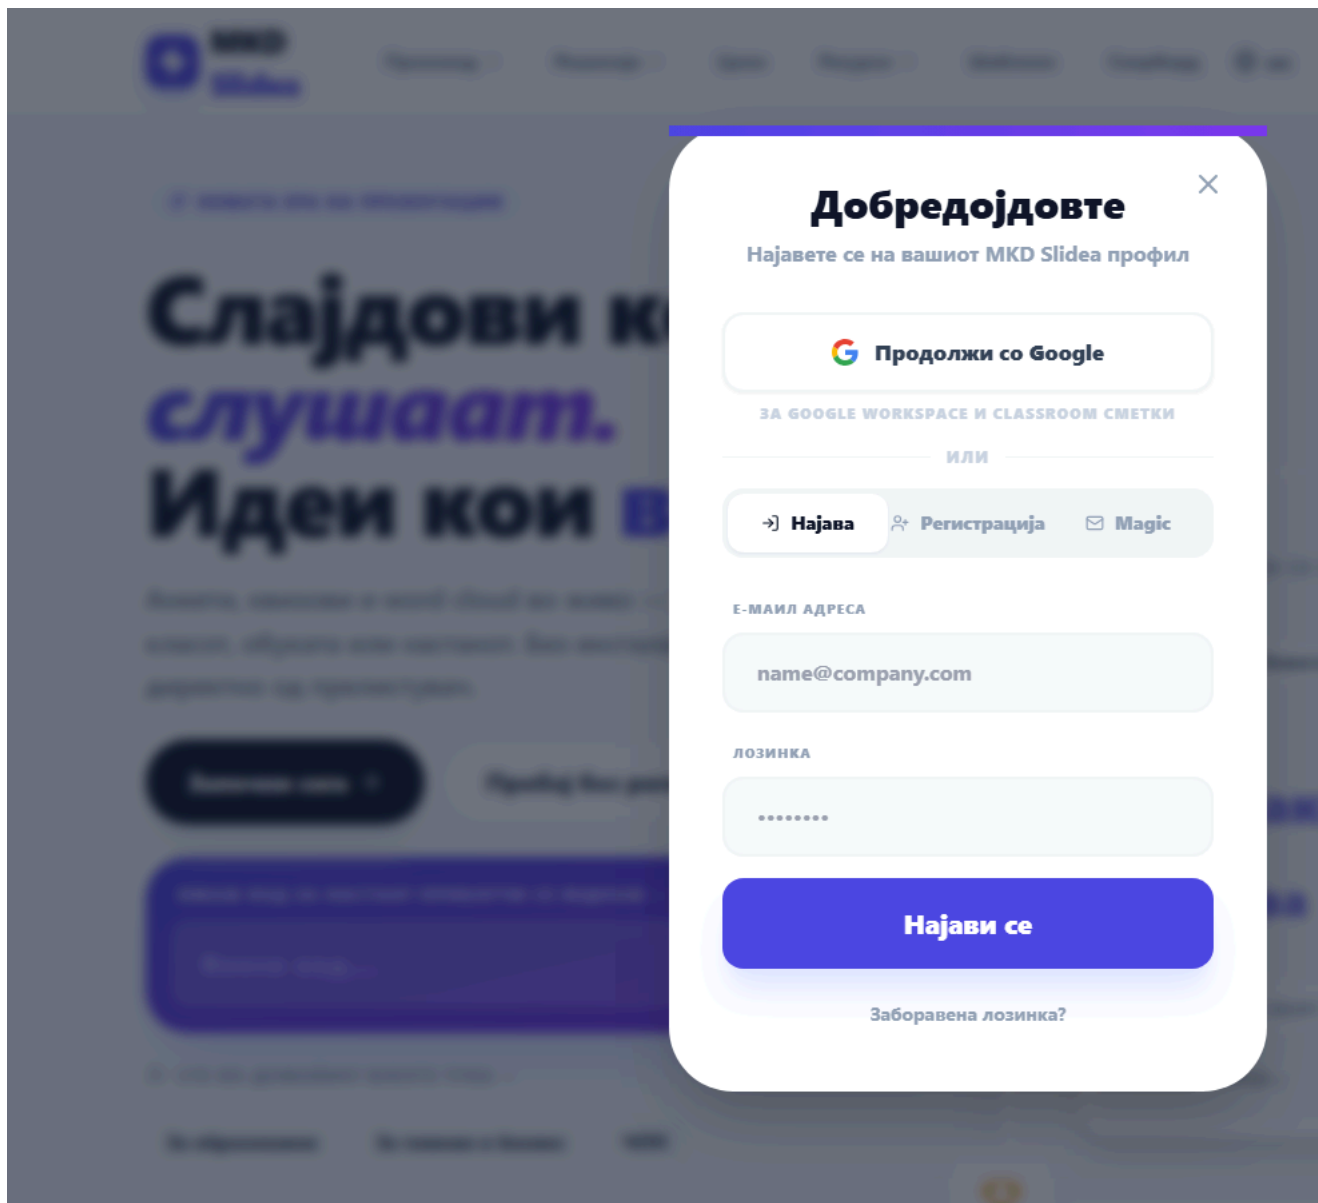

Landing page hero

The landing page. The gradient card on the left lets a participant enter a session code directly; the host signs in from the top-right.

2.2 Signing in

Click **Sign in** (top-right) to open the login dialog. Enter your email and password, or continue with Google.

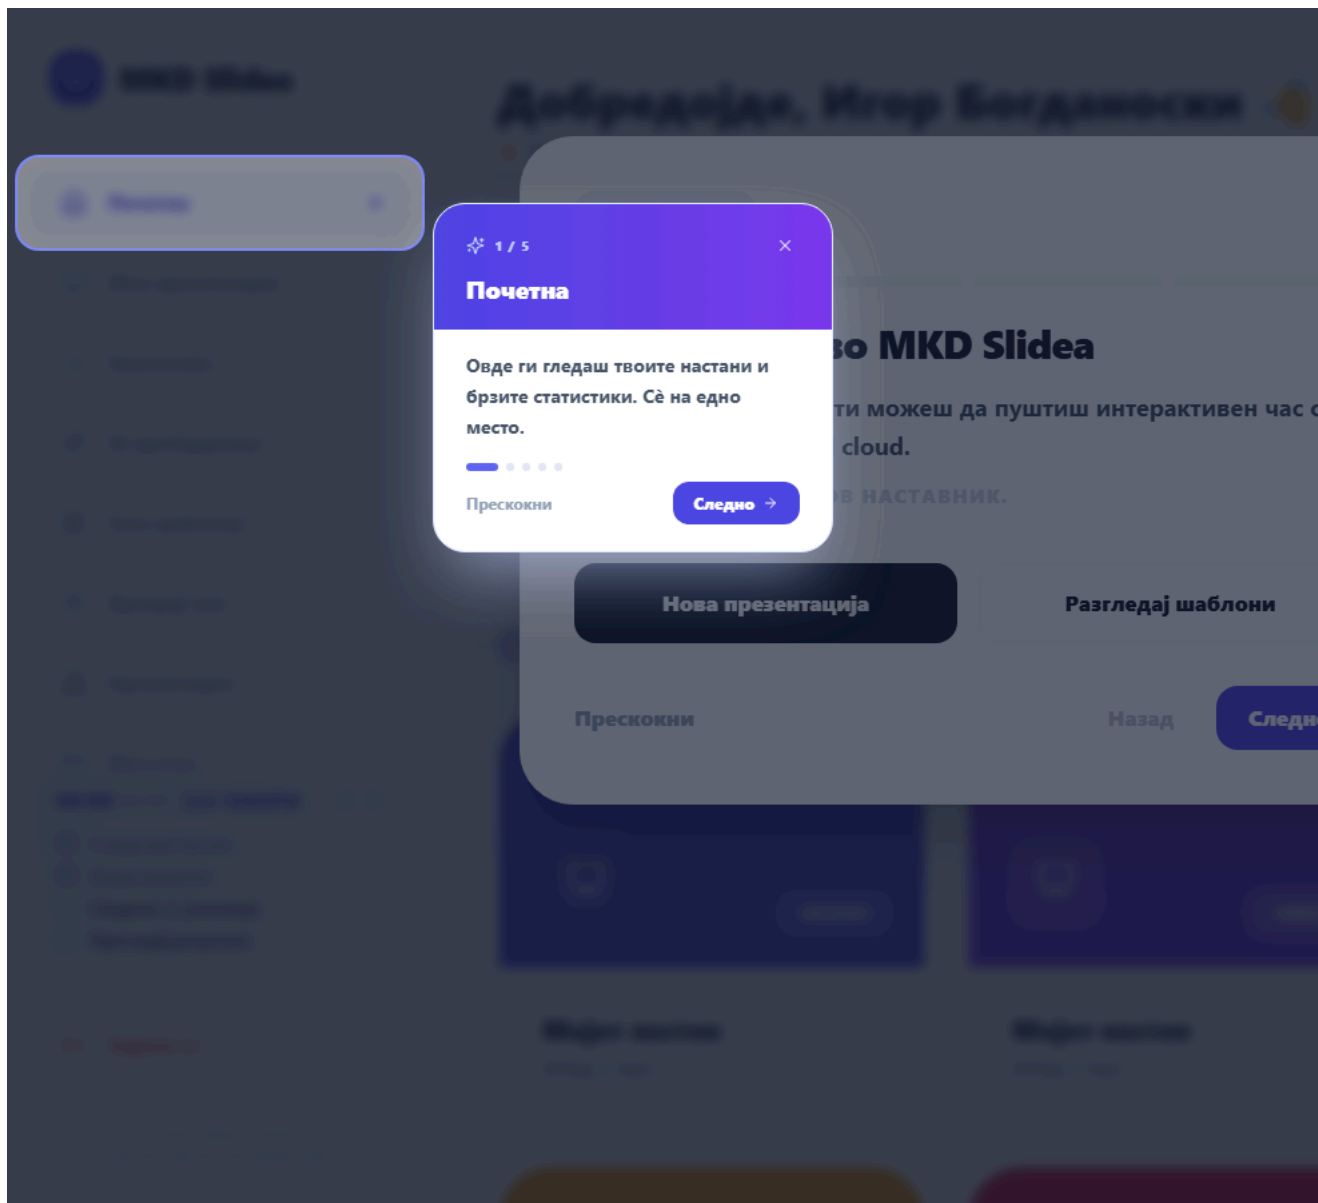

Login dialog

The sign-in dialog supports email/password, Google, and a passwordless Magic Link.

If you don't have an account yet, switch to the **Register** tab — it takes a few seconds.

3. Your Dashboard

After signing in you land on the **Dashboard**, your control center. The left sidebar holds every section.

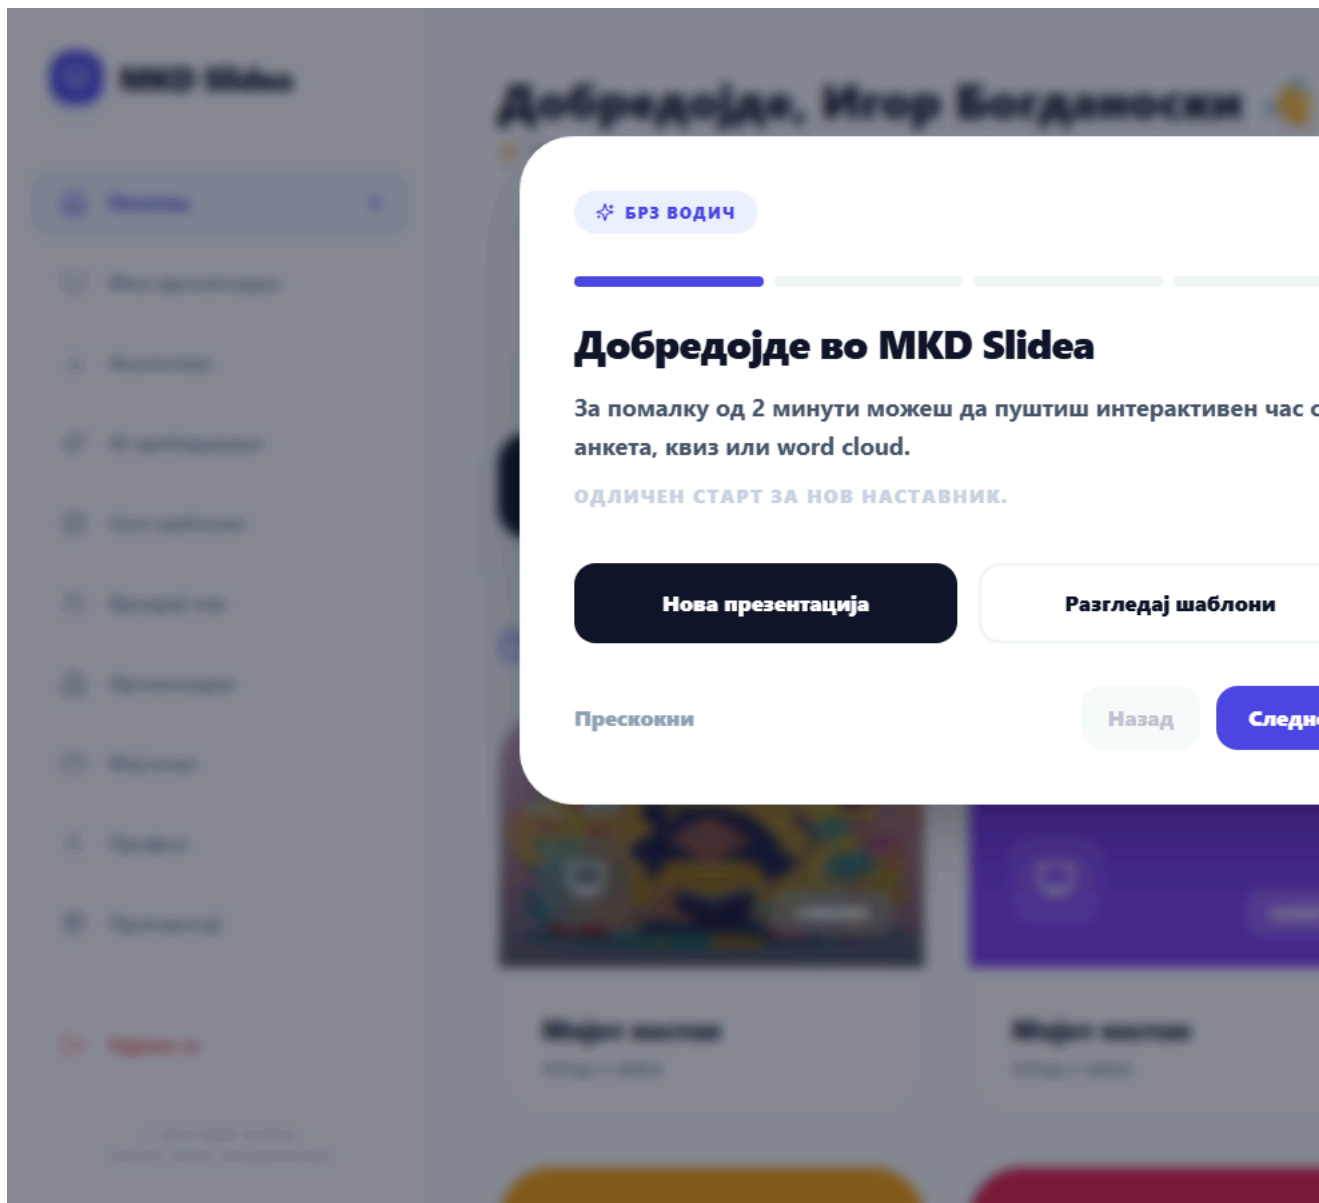

Dashboard home

The Dashboard home shows your recent events, quick actions, and a usage meter for your plan.

3.1 My Presentations

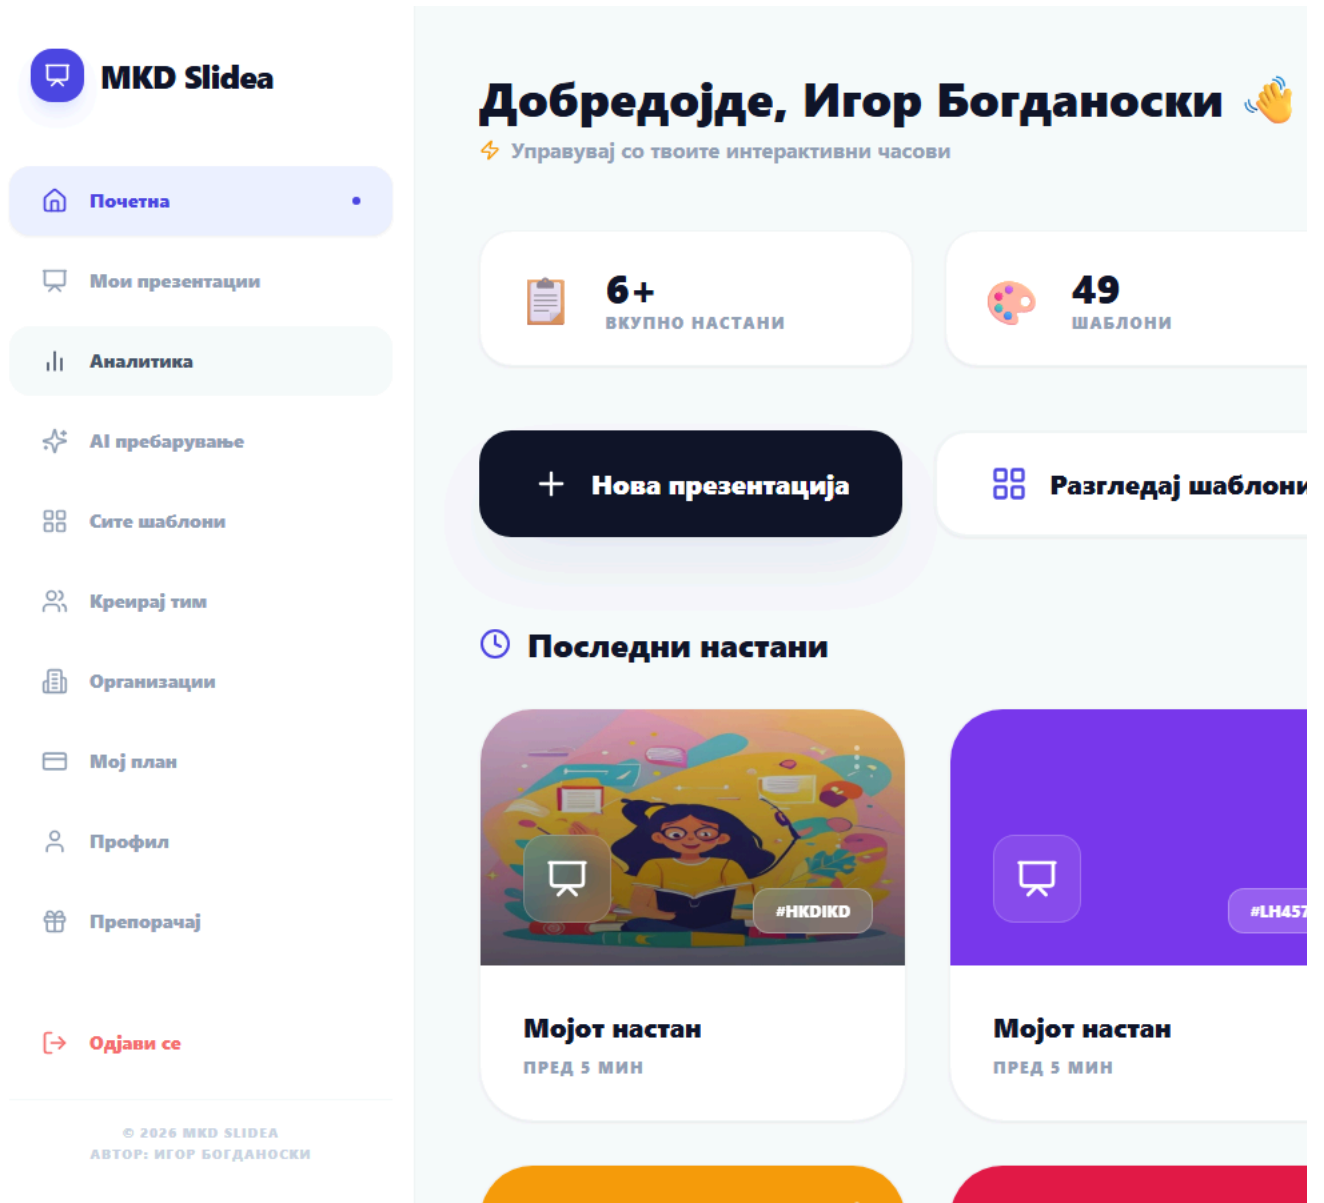

All your events live here. Open any event to manage it, duplicate it, or launch the presenter.

My Presentations

3.2 Analytics

Review how your sessions performed — participation, response rates and trends over time. *(Pro feature.)*

Analytics

3.3 AI Search

Ask a question in plain language and search your curriculum and past content semantically — powered by AI embeddings.

4. Creating Your First Event

From the Dashboard, click **New presentation** (or open an existing event). You enter the **Host view**, where you build and run your session.

4.1 The activity list

Every activity (question) you add appears as a card. Click a card to make it **active** — that's what your audience sees and responds to right now.

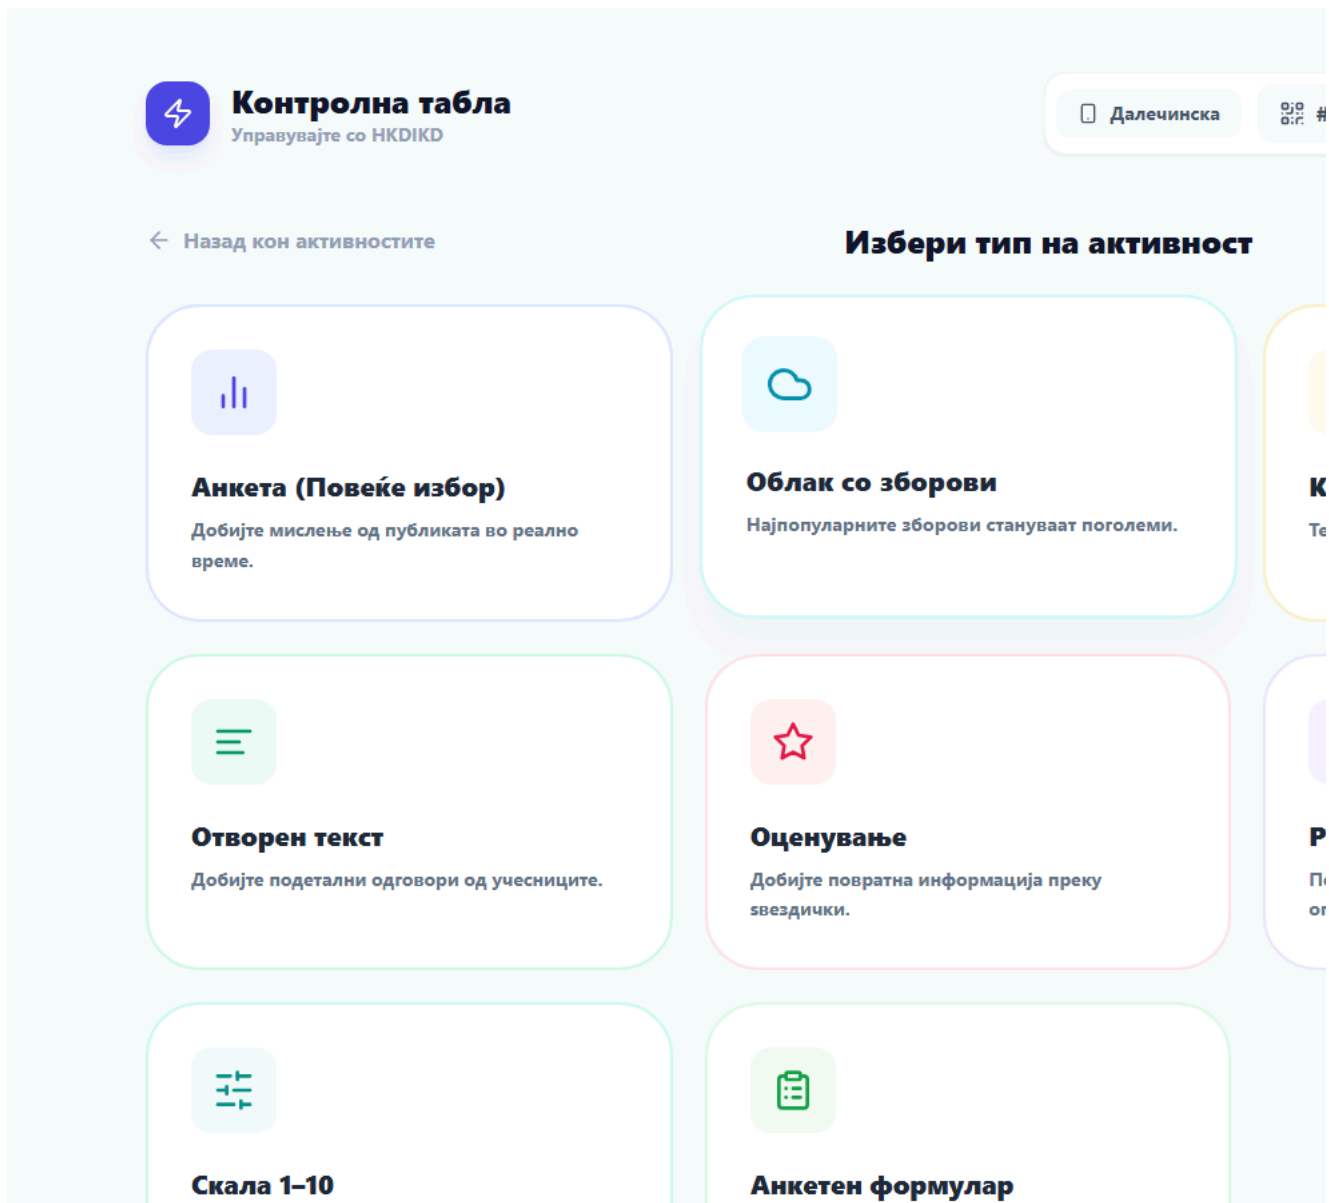

Host activity list

Each card is one activity. The active one is highlighted; click any card to put it on screen.

4.2 Choosing an activity type

Click **Add activity** to see all 8 activity types. Pick the one that fits your goal.

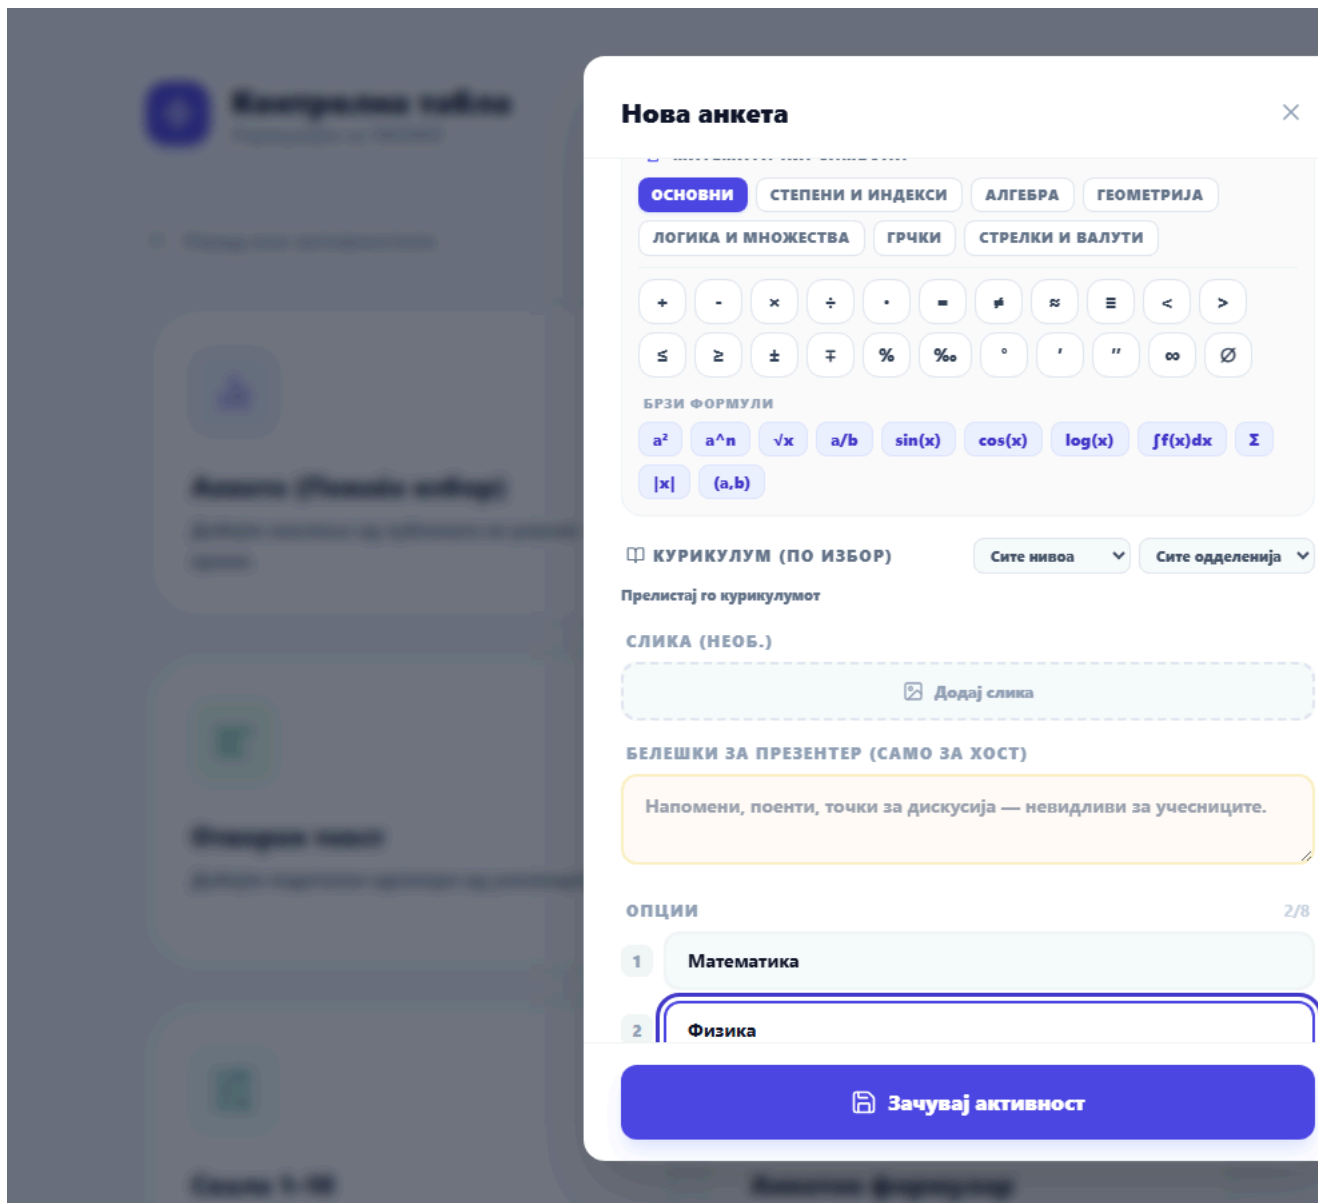

Activity type picker

The eight activity types: poll, word cloud, quiz, open text, rating, ranking, 1–10 scale, and survey form.

5. Adding Activities

5.1 A poll (multiple choice)

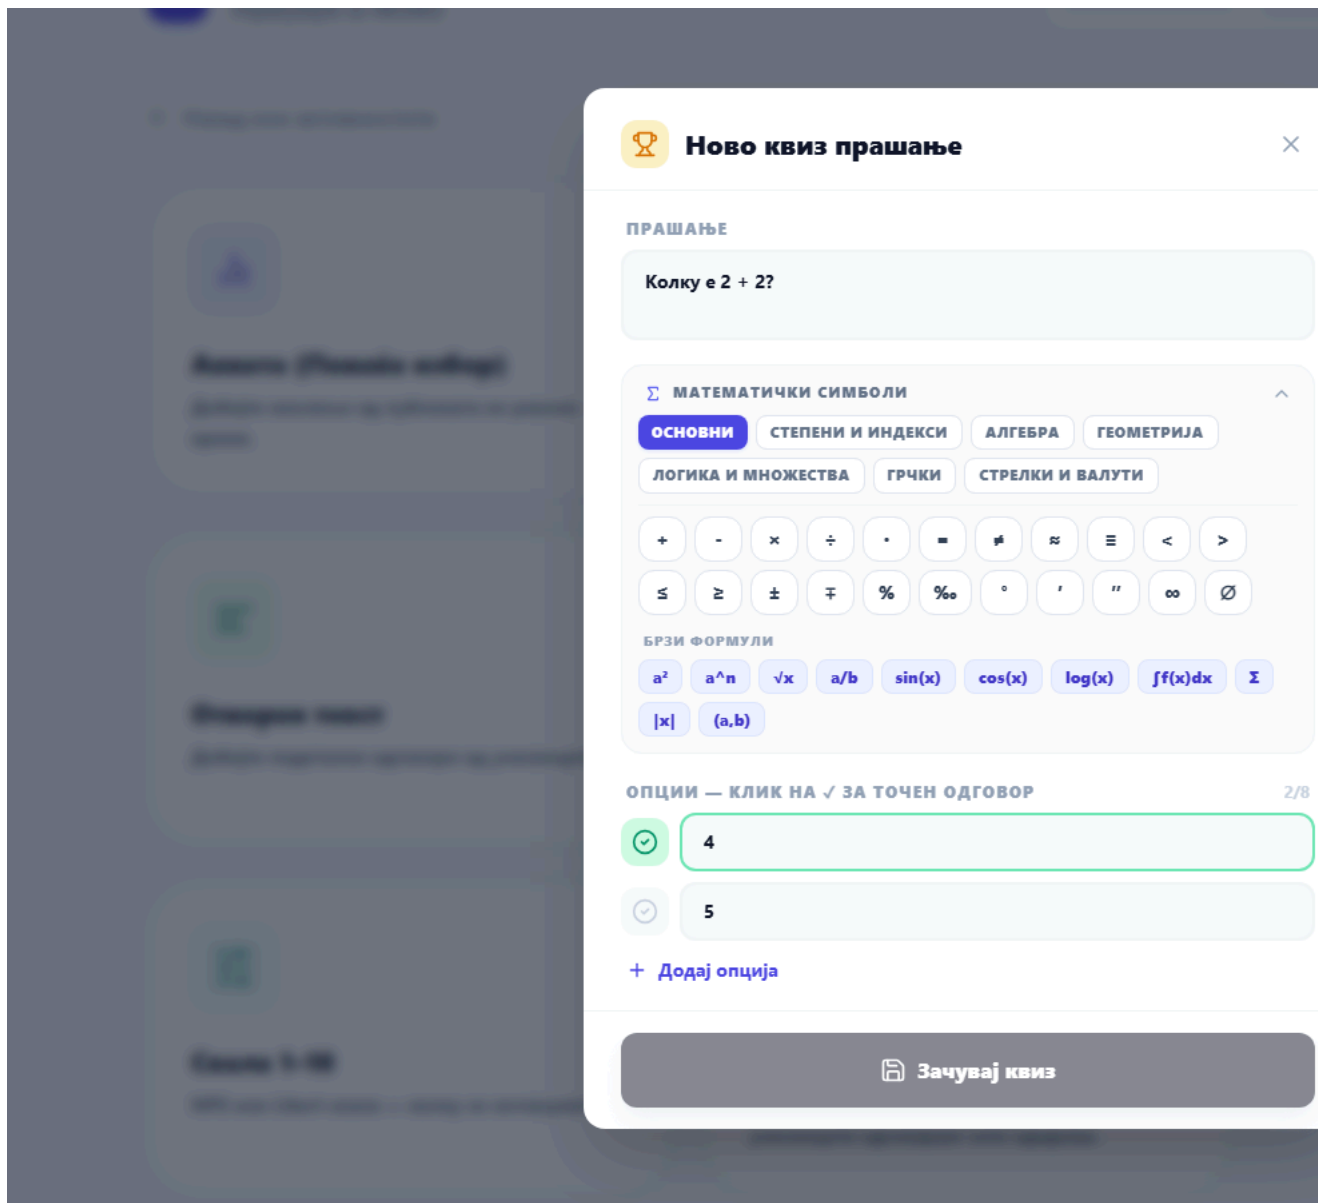

Type your question and the answer options, then **Save activity**.

Create a poll

5.2 A quiz (with a correct answer)

Same as a poll, but mark the correct option with the ✓ button. Quizzes give participants instant feedback and build a leaderboard.

Create a quiz

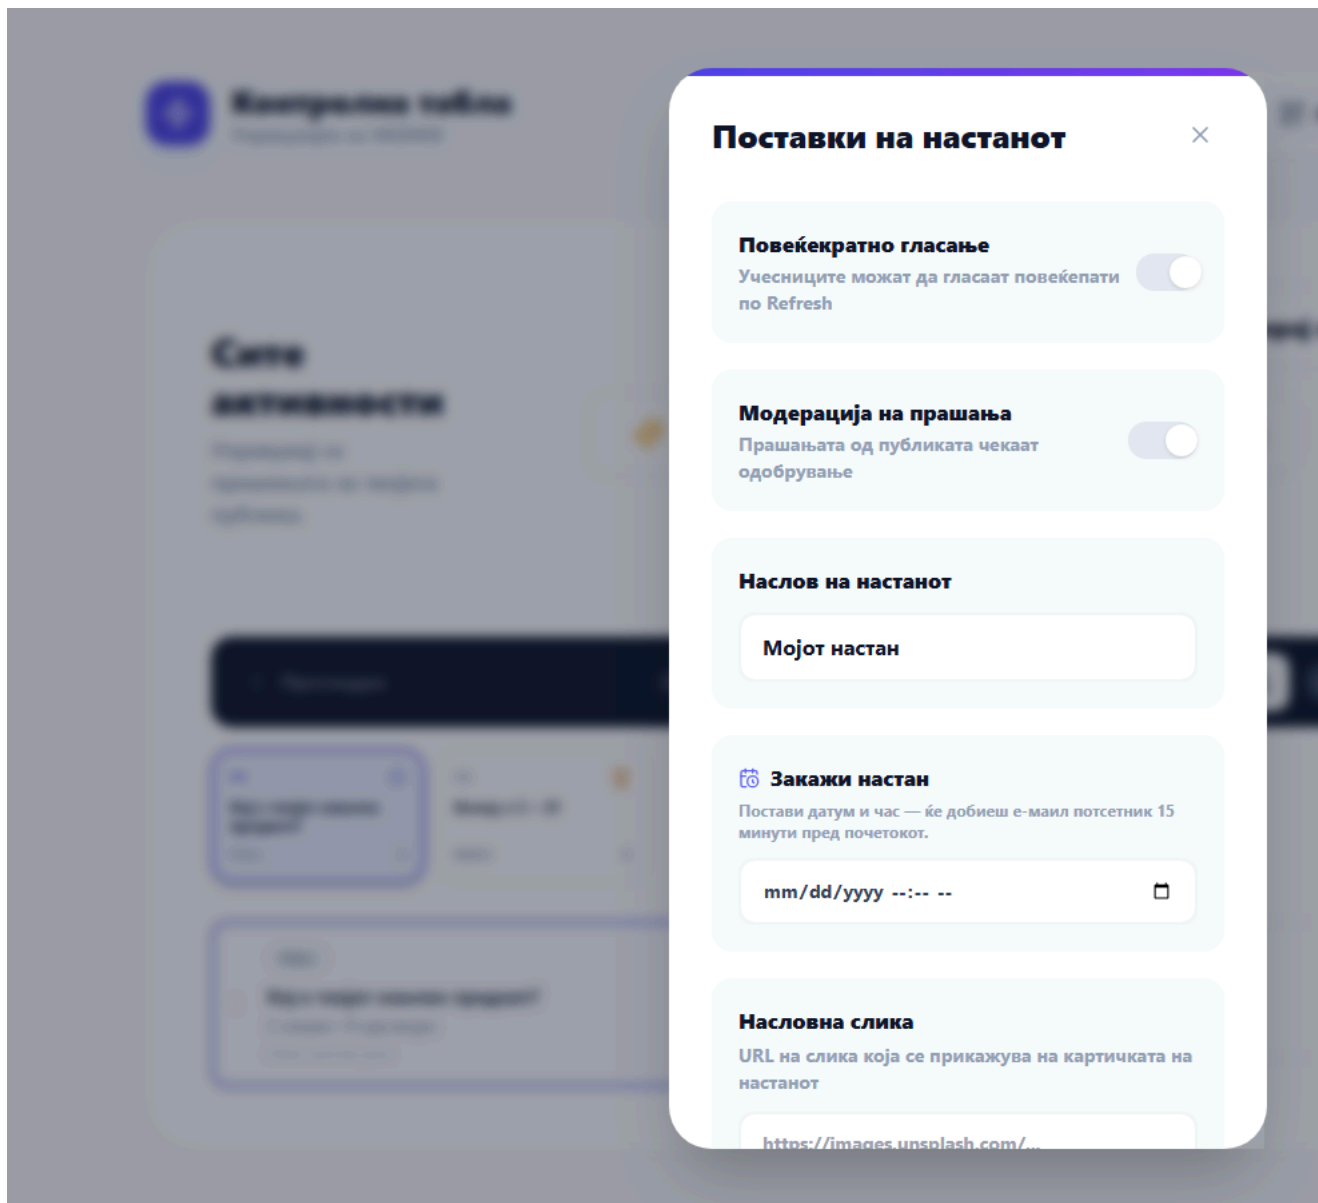

5.3 Other types

- **Word cloud** — participants submit single words; the most common grow largest on screen. Great for warm-ups and brainstorming.
- **Open text** — free-form answers shown as sticky notes.
- **Rating** — a 1–5 star rating for quick pulse checks.
- **Ranking** — participants order items by importance (the whole order counts, not just the top pick).
- **Scale 1–10** — a slider-style agreement scale.
- **Survey** — several sub-questions at once (open, scale, or choice).

Tip: You can attach an image to any activity, and let AI suggest or generate the question for you.

6. Event Settings & Branding

Open **Settings** (gear icon) to control your session: schedule it for later, set a cover image, choose your brand color and font, upload a logo, enable a password, or allow multiple votes per participant.

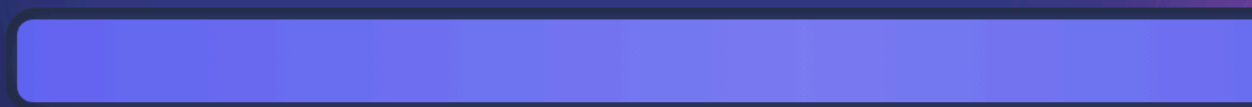

Event settings

7. Going Live — The Presenter View

Click **Presentation** (or open `/event/<code>/present`) to show your session on the big screen. As people respond, the results animate live.

Presenter with live results

The presenter view: the live question, an animated bar chart of responses (the leading option wears a ) , the participant counter (“2 live”, “1/2 answered”), and a chart-mode switcher (Bars / Donut / Podium / Numbers). A QR code and the join code are always visible.

You can switch chart styles, **pause** voting, run a **timer**, or fire **confetti** to celebrate a result. For quizzes, a **leaderboard** appears on the right.

7.1 The Remote Control

While the presentation runs on the projector, open the host page on your **phone** and tap **Remote**. Your phone becomes a clicker — advance questions, lock voting and reset with big, one-tap buttons.

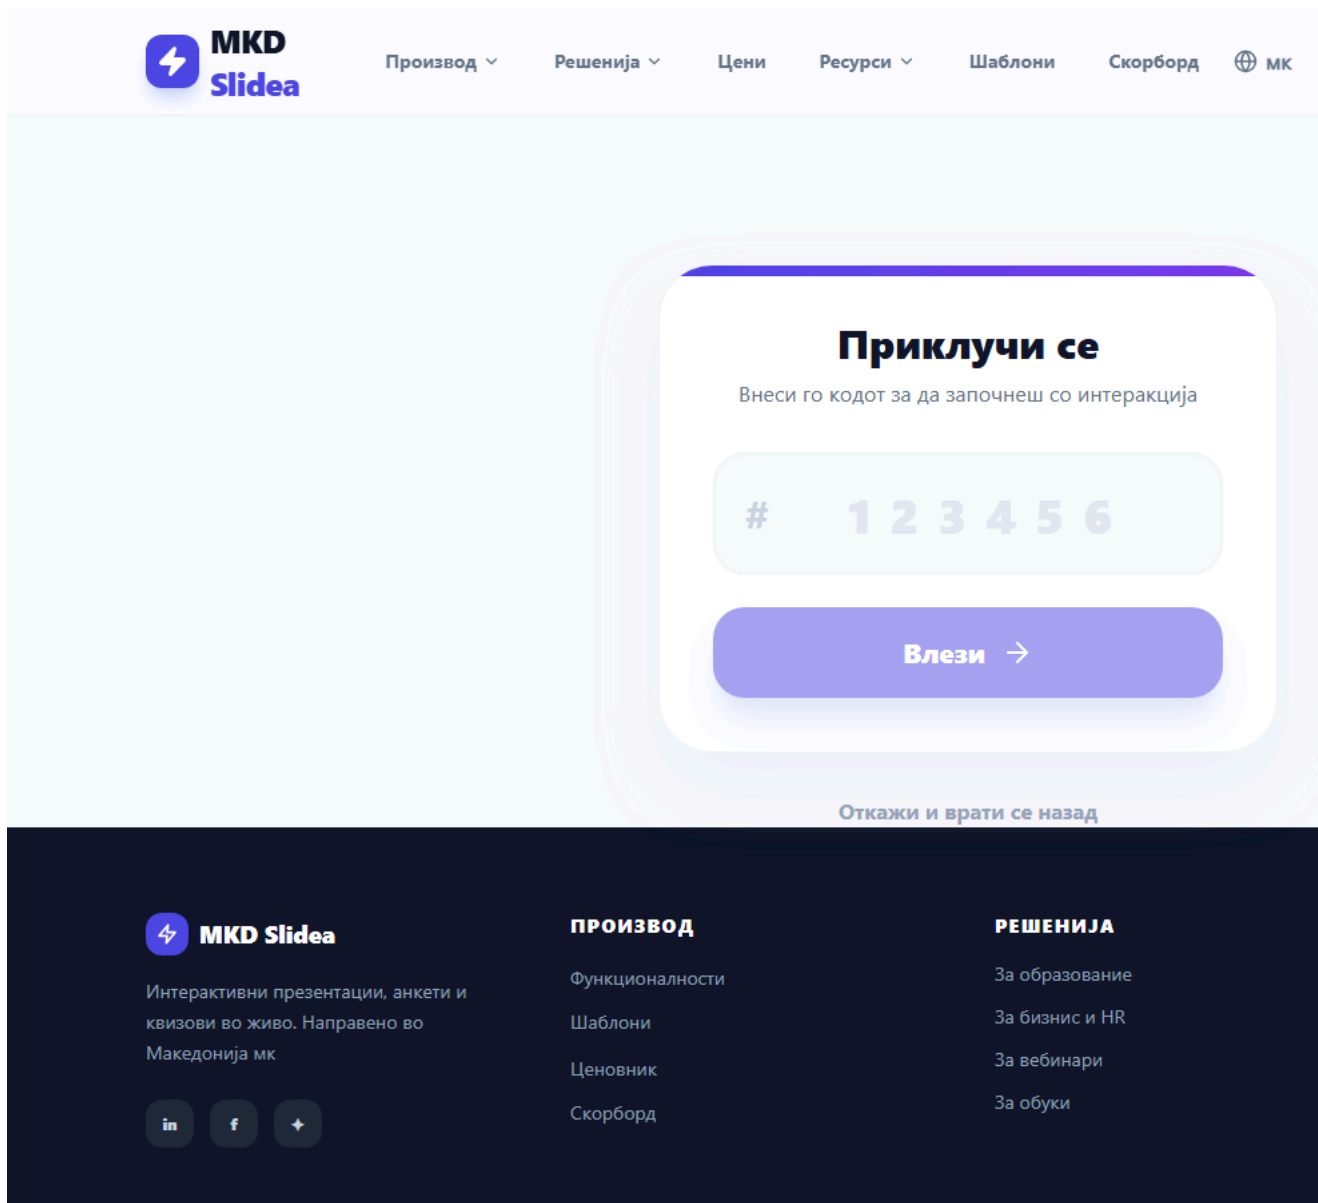

Remote control on phone

The phone remote: the active question, response progress, and large previous/next, lock and reset controls.

8. For Participants — Joining & Responding

8.1 Joining

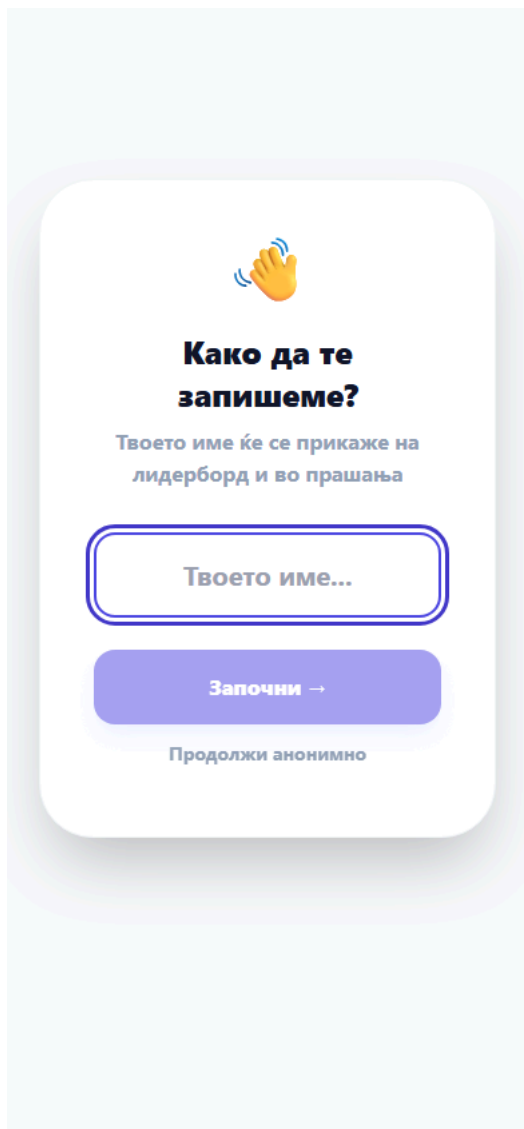

Participants go to the join page and enter the code shown on the presenter's screen (or scan the QR code).

Join page

8.2 Entering a name

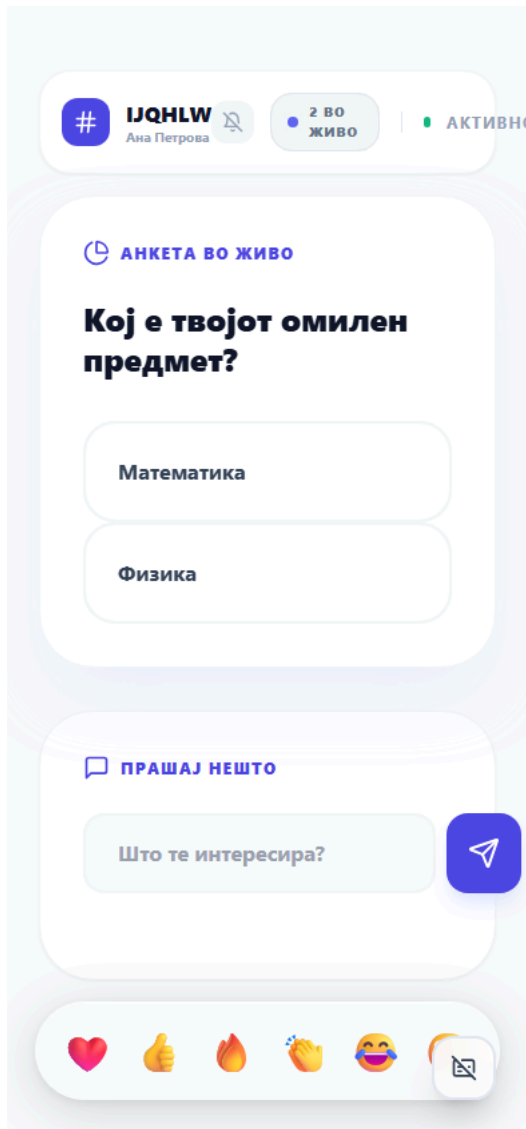

A friendly prompt asks how to call them — this name shows on leaderboards and in Q&A. They can also continue anonymously.

Enter your name

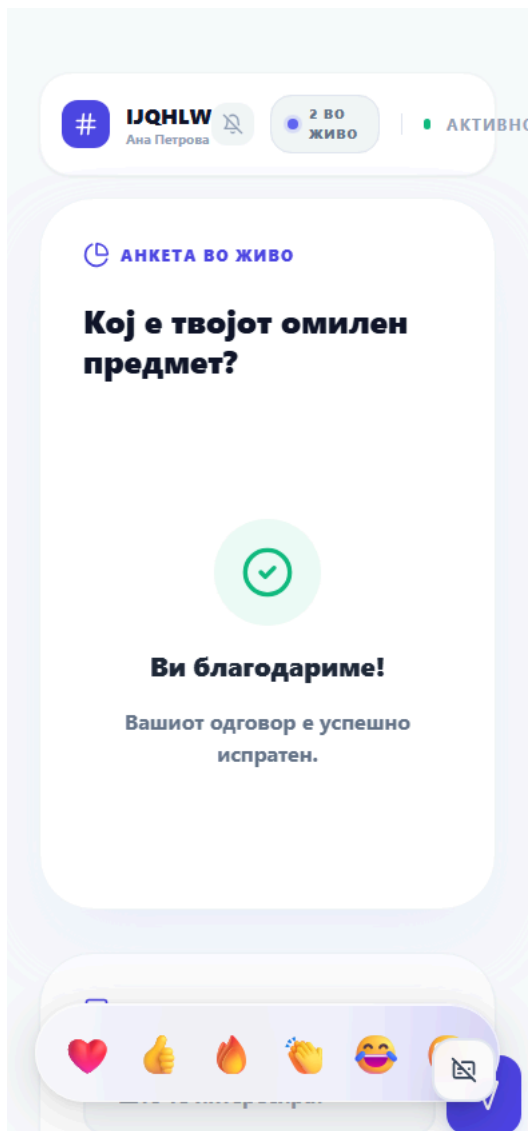

8.3 Answering

The active question appears on their phone. For a poll or quiz, they tap an option; for a word cloud or open question, they type and send.

A poll on the participant's phone

After answering, they see a confirmation (and, for quizzes, whether they were correct).

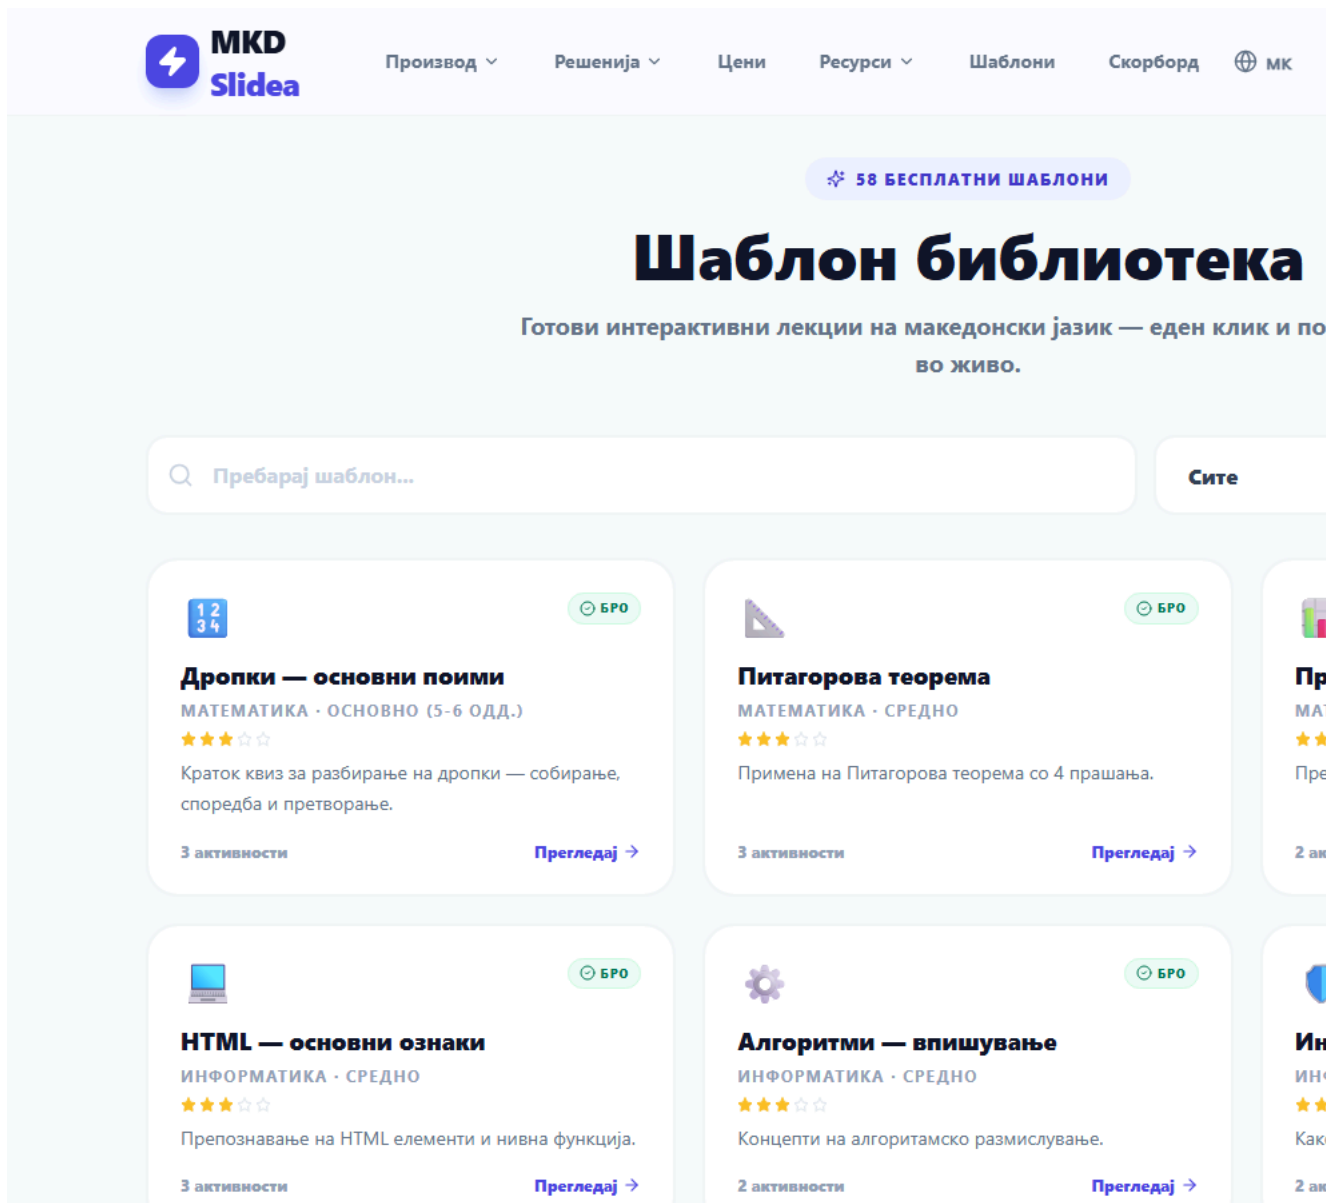

Vote confirmed

9. Templates & Pricing

9.1 Templates gallery

The public gallery offers dozens of curriculum-aligned templates you can apply in one click — or contribute your own.

Templates gallery

9.2 Plans

The **Free** plan covers most needs (up to 200 participants). **Pro** unlocks unlimited participants, branding, exports and AI insights. Schools and organizations can get institutional licenses.
